Date and product change

Fictional case data and worked reasoning

A manufacturer will provide a batch of building sensors on the Union market for the first time on 15 November 2027. A security update in January 2028 fixes a vulnerability. It does not change the intended use and other product functions in the case. A second January update is to allow remote control of devices for the first time. Product management confirms a new intended purpose. Another batch of the old model will be made available on the Union market only in January 2028 for the first time ever.

Test point	Purpose or comparison	Observation	Decision
First batch market delivery before 11 December 2027		15 November 2027	Check the stock product
Pure security update	Purpose and other effect unchanged	Only remedy in case evidenced	Transition remains relevant
Remote control and new batch	Own purpose or initial provision	Both confirmed in January 2028	Check General Path

Expected result

The deadline for the submission of a reasoned transition, own reporting and responsibility.

Enter market entry and change per batch with date and location.

Assess the purpose and requirement of the concrete change.

The manufacturer shall carry out the reporting test at the approved trigger independent of the transition.

Counter-test and next decision

Remove the original January batch and leave only the date of manufacture. The classification remains open until the actual date of placing on the market is established.

Date and product change

For your observation, specify a findable document.

Evaluate initial deployment and modification per product or batch. Perform reporting obligations separately.

Verification identification, legal entity and date of processing and responsible body

Charge, version, market and initial production document

Date and scope of the amendment

Purpose before and after amendment

Influence on essential requirements and evidence

Own time-based reporting decision

Date and product change

Refer remedial and post-test to the original test order.

Findings and supporting evidence

The gap to be closed before the next delivery stand

Tested follow-up test with date, observation and version documentation

Reasoned transitional decision with verifiable date

Release by and on the open order and date
