Alarm delivery test protocol

Check alarm, transmission route and processing with specifically triggered test signals.

Legal entity, function and scope

Determine the date, performance and role of responsibility with the own verification identifier.

Evaluate measurement

Enter the same unit for target and is. Set the direction of assessment and complete the professional sample.

What facts and evidence do the decision bear?

Select the information relevant to your criterion. Note version, location and reference to your own process for each document.

Own decision and open order

The time and delivery sample shows alarm cause, receiver, escalation and proven fix.

Transfer the sample case to the own holding

During a controlled test, a memory error creates an event. The primary channel is silent unplanned.

Example check	Documented status
Scale A agreed receiver confirms the alarm within five minutes.	
Observation In the event system there is an alarm, in the receiver no confirmation is available.	
Reasoned follow-up	Follow delivery and escalation after correction with unchanged test signal and independent time source.

Keeping your own deviation and expected effect

What acceptance changes your decision? Determine which own sample and what proof clarify the open question.

Connect test documents, findings and acceptance

Link each sample with a unique identifier. In case of a different activity, replace the criterion by the test position relevant to your job.

Link detection rules to data sources and decision

2024/1774 · Art. 23 · Check an approved reference signal before and after a rule correction.

Observation and evidence

Specify the observed result, location and status.

Detect anomalies and failure indicators

Article 10 para. 1 · Create a harmless replacement signal in an approved operation exercise and measure delivery.

Observation and evidence

Specify the observed result, location and status.

Correction, follow-up date and release

Determine the finding, the correction responsible, the post-test and the decision with date.
