GPAI Disclosure and Authorisation

Fictional case data and worked reasoning

KI18 · Two of three publicly required types of evidence are documented. The architecture is missing. The public training summary is still part of M1.

Test point Purpose or comparison Observation Decision		
Publication	Three types of documentation architecture internally exception open	
Summary	M2 Public version M1 Correction	
Test counter-probe Systemic risk		Risk confirms full obligations

Expected result

A release note with an audited exception, jurisdiction and documented publications.

Evidence of public evidence and rights per release

Systemic risk and mandate to be assessed

Understanding public summary and decision

Counter-test and next decision

Set the model classification to "systemic risk confirmed". The open source exceptions under Art. 53 para. 2 and Art. 54 para. 6 do not bear the release. Also document the EU mandate confirmed for M2.

GPAI Disclosure and Authorisation

For your observation, specify a findable document.

Run license, public documents as well as copyright strategy and training summary per version. Check the EU mandate separately.

Verification identification, legal entity and date of processing and responsible body

Model and establishment of the supplier

License and confirmed freedom of use

Public parameters, architecture and usage

Risk classification and mandate or exemption

Technical documentation and integrator documents

GPAI Disclosure and Authorisation

Refer remedial and post-test to the original test order.

Findings and supporting evidence

Copyright strategy, training summary and correction

Tested follow-up test with date, observation and version documentation

Release per remaining obligation

Release by and on the open order and date
