Market monitoring and effectiveness of the remedy

Fictional case data and worked reasoning

KI14 · 2 of 80 correspond to 2.5 percent, 6 of 80 equal 7.5 percent. Week 39 triggers a reaction at the exercise threshold from 5 percent.

Test point Purpose or comparison Observation Decision	
Week 38 At least 50, reaction from 5%	2 of 80 · 2.5% below threshold
Week 39 At least 50, reaction from 5%	6 of 80 · 7.5% reaction required
Counter sample At least 50 0 12-degree error missing	

Expected result

A rewriteable observation stock with quota, response needs and separate technical decision after the post-test.

Version, period and population

Record quota, comparability and separate event decision

Review remedy and resumption of the new situation

Market monitoring and effectiveness of the remedy

For your observation, specify a findable document.

Run defined observation windows with confirmed critical cases and fixed minimum number. Determine responsibility, remedy and recovery separately.

Verification identification, legal entity and date of processing and responsible body

System version, period and compared case group

Valid sample and confirmed deviations

Minimum case number and reaction threshold

Observation source and impact on the holding

Response, operator notification and possible notification

Market monitoring and effectiveness of the remedy

Refer remedial and post-test to the original test order.

Findings and supporting evidence

Test order for correction and location

Tested follow-up test with date, observation and version documentation

Resumption or resubmission

Release by and on the open order and date
