Systemic GPAI risk and notification file

Fictional case data and worked reasoning

KI19 · The overrun is known on October 5. The calculation mark is on October 19. One out of six evaluations remains open.

Test point Purpose or comparison Observation Decision	
Knowledge Early confirmed planning	5 October
Notification Recalculation Mark 19 October Release on 6 October Precalculation Mark	
Reviews Six documents Five of six follow-up tests open	

Expected result

A documented communication file with a calculated maximum mark, separate decision on immediacy and open assessments.

Threshold, Capability and Case Group

Reconstructing Early Knowledge and Submission

Treat missing evaluation evidence with post-test

Counter-test and next decision

Enter 20 October as the dispatch date and retain 5 October as the date of awareness. Then use exactly $10^{2?}$ FLOPs. At that figure, the compute-based presumption does not apply. The capabilities and any decision by the Commission still need to be checked.

Systemic GPAI risk and notification file

For your observation, specify a findable document.

Capture the training effort, confirmed case group and earliest knowledge. Continue the evaluation evidence separately.

Verification identification, legal entity and date of processing and responsible body

Model version and competent body

Cumulative calculation effort and document version

Early confirmed knowledge or entry

Transmission and reception

Assessments, findings and remaining risk

Systemic GPAI risk and notification file

Refer remedial and post-test to the original test order.

Findings and supporting evidence

Remedy and re-results per finding

Tested follow-up test with date, observation and version documentation

Confirmed decision on notification and model file

Release by and on the open order and date
