Management decisions and training effect

The completed case shows how the target, observation and follow-up are related.

A restart test provides a time difference. The management decides to remedy the situation and checks in the following date whether the business process concerned is fully possible again.

Test question Should or Compare Observation Decision			
Decision	Target, role and resubmission	90 minutes planned, operator confirmed	Recruiting
Monitoring	Measurement at the same service	Technical availability after 114 minutes	Remedy with scheduled sample
Training Management evaluates concrete performance		Participation evidenced, decision missing in sample	Exercise assignment as own proof
