MSP significantity and loss threshold

the framework, agreed benchmark and the effect to be tested before the first run.

Calculate selected alternatives to loss and MSP availability. Sample two additional recurring incidents.

Legal entity, service and audit period

Specify the identifier, status, period and responsible body.

Base and effect evidence

Record last year's turnover, direct losses, EU users, part and full loss.

Further criteria to be assessed

Evaluate all other alternatives of the DVO separately with Yes, No or Open.

Grouping Recurring Cases

examine the period, individual evaluation, cause and common sum.

MSP significantity and loss threshold

The completed case shows how the target, observation and follow-up are related.

For 20.000 EU users, 1.001 affected persons exceed the alternative of 61 minutes according to Art. 10(b) Two similar incidents without common identifiable cause do not meet the same collective test.

Test question Should or Compare Observation Decision			
MSP restriction	More than 1.000 and more than 60 minutes	1.001 Patients over 61 minutes with 20.000 EU users	Alternative Art. 10(b) fulfilled
Loss limits	Lower value from 5 percent or 500.000 EUR	prior-year sales EUR 4 million, border 200.000 EUR	Only cover qualifying losses
Counter-prob e	Repeated within six months, same cause	Two cases, different identifiable causes	The standard criterion does not bear the classification

Which result is passed

Calculation of the tested alternatives with open questions for the substantive decision.

Comparison with your own process

What is the acceptance or result of your actual data?

MSP significantity and loss threshold

Confirm the observations and place a specific order for open points.

1 MSP restriction

Criteria and agreed target value observation and clear evidence

2 Limit of loss

Criteria and agreed target value observation and clear evidence

3 negative test

Criteria and agreed target value observation and clear evidence

Evaluation and open findings

Decision, deviation from the target and the performance concerned.

Follow-up and release

Enter the responsible body, due date, re-certificate and release if necessary.
